Welcome to the 2020 Ramsay Park Studs Ram Sale

The Ramsay Park White Suffolk Stud was established in 1997 and since then we have continually sourced the best genetics available to help improve the quality and consistency of our flock. In 2010 we started our Black Composite breeding program, combining the carcass qualities of a Hampshire Down with the clean points of a Suffolk. Our aim at Ramsay Park is to produce well-muscled, functional, paddock reared flock rams, with a balance of visual and genetic qualities.

We have been involved in showing stock at Royal and country shows since 1994 and see this as an important part of our stud's program, helping us to gauge our progress against the top studs in Australia for type and genetic gains.

To keep improving our genetic base, we are constantly sourcing top sires or use artificial insemination. The use of AI enables us to use the best genetics which would otherwise be unavailable to us and has helped in the rapid growth of our stud. Our flock is now back in Market Assurance program with an MN3 status. The flock is tested Brucellosis Free and Lambplan tested.
